Administration instructions	

The owner is to provide the medication which must include:

The original container from the Vet with written instructions clearly on the label.

The label must have a description of the medication, frequency of medication, to take with or without food, expiry date, and name of the dog.

Medication must be in date and not expired.

Medications will not be administered if any of the above criteria have not been supplied.

Owner will be notified as soon as possible if medication cannot be administered.

Medication name	Date	Time	Administered by	Signature
